

Entire Lakehouse Sentinel

Code-to-Lakehouse blast radius auditor — entire graph + entire checkpoint + Databricks Unity Catalog

Generated 2026-09-06 · repo MetalTanuj/entire-hackathon · catalog main

tune-timeout PASS

Constant change. Nothing downstream depends on it.

```
What git shows a reviewer:

commit 5d4af59 — Widen session timeout to 45 minutes
    pipeline/silver.py | 2 +-
    1 file changed, 1 insertion(+), 1 deletion(-)

What the Sentinel shows:

ENTIRE LAKEHOUSE SENTINEL

CHANGED (1 entities)
    pipeline/silver.py :: pipeline/silver.py [body_changed]

WRITES (0 tables)

BLAST RADIUS
    (nothing downstream)

LAKEHOUSE VERIFICATION (live Unity Catalog schema)
    no column-level break detected

INTENT (entire checkpoint)
    no checkpoint on this branch — change has no recorded intent
```

drop-country BLOCK

Removes a live column three gold tables sit on.

```
What git shows a reviewer:

commit 35e4c91 — Drop unused country column from sessions
    pipeline/silver.py | 3 +--
    1 file changed, 1 insertion(+), 2 deletions(-)

What the Sentinel shows:

ENTIRE LAKEHOUSE SENTINEL

CHANGED (1 entities)
    pipeline/silver.py :: clean_sessions [body_changed]

WRITES (1 tables)
    main.silver.sessions
```

BLAST RADIUS

`main.silver.sessions`

└─ `main.gold.daily_revenue` ← `pipeline/dashboards/revenue.sql`

└─ `main.gold.revenue_by_country`

└─ `main.gold.user_retention`

LAKEHOUSE VERIFICATION (live Unity Catalog schema)

HIGH RISK `main.silver.sessions.country (string)` is dropped

but `pipeline/gold.py::refresh_country_rollup` still reads it

INTENT (entire checkpoint)

no checkpoint on this branch – change has no recorded intent

Both commits touch one file and look near-identical to git. The audit separates them using the live column list from Unity Catalog: `main.silver.sessions.country` exists in the Lakehouse today, and `refresh_country_rollup` in a different file still reads it. The downstream table graph is derived from the repository; column truth comes from Databricks, which a CTAS pipeline never declares in code.
